## Professional Summary

Decision Scientist with over 4 years of experience delivering AI-driven and data-centric solutions across oil & gas, retail, and healthcare industries. Skilled in building APIs, cloud-native applications, and analytics systems that optimize planning, automate workflows, and drive measurable business impact. Strong communicator with a proven track record of collaboration across cross-functional teams.

## Experience

### Decision Scientist — Mu Sigma Business Solutions Pvt Ltd (2022 – Present)

#### Optimized Work Order Planning (Oil & Gas)

Automated maintenance job planning through an AI-powered API, reducing manual effort in identifying required parts.

Delivered quarterly savings of \$1.5M by improving planning efficiency and reducing downtime.

Deployed solution on Azure cloud, ensuring scalability and reliability for client operations.

#### Wells Lookback Summarizer (Oil & Gas)

Built an AI-based summarization engine to extract key insights from historical well reports.

Reduced report generation time by 90% (from 24 hours to 5 minutes) across 7 business units and 3000+ users.

Designed retrieval-augmented pipeline using Azure Cognitive Search for contextual grounding.

#### Omni Order Sourcing (Shoe Retailer)

Developed APIs to optimize wholesale order inventory and replenishment planning.

Increased revenue by \$2M and prevented stockouts by 40%.

Consolidated 25 legacy rules into 10, reducing complexity in inventory decision-making.

### Programmer Analyst — Cognizant Technology Solutions Pvt Ltd (2020 – 2022)

#### IQ Workflow Automation (Medical Device Manufacturing)

Automated manual workflows in client's insurance-related processes using Python and SQL pipelines.

Improved accuracy of contract data validation by 25% and reduced SLA breaches.

Built monitoring dashboards to track workflow metrics and ensure compliance.

## Education
