

Kirthi Hariharan

kirthyh@gmail.com | +91 9940345625 | <https://in.linkedin.com/in/kirthi-hariharan>

Skills

Technical: SQL, Python, R, Excel, Databricks, EDA

Business Intelligence Tools: Tableau, Spotfire

UI/UX Design: Figma

Soft Skills: Project & Stakeholder management, Data storytelling, Cross-Functional Team Collaboration

Project Management: Jira, AHA

Work Experience

Apprentice Leader | Mu Sigma

Jul 2021 - Present

Leading a team of 6 members, managing task coordination, aligning efforts with project goals, and driving client communication, including collaboration across cross-functional teams.

Therapeutic Area Analytics & Leadership Reporting

- Engineered a scalable data pipeline using Python and SQL, automating 100% of reporting workflows and reducing overall manual effort in the data lifecycle by 75%
- Developed Tableau dashboards and automated scorecards by integrating finance, clinical, and publication data
- Enabled tracking of study risk and performance across therapeutic areas and markets, delivering executive summaries for the executive level Medical Leadership team
- Drove cross-functional alignment on BoW and improved decision-making through streamlined, accessible insights

HCP Prioritization for a leading pharmaceutical & medical devices company

- Developed an interactive Tableau dashboard to rank HCPs based on engagement, sales potential, and digital behaviour
- Mapped HCP journey stages to support timely and effective follow-ups
- Automated priority scoring which reduced manual tracking time by 60%
- Enabled targeted outreach which improved engagement rates with high-value HCPs by 25%

Clinical Trial Analytics & Forecasting Dashboard

- Developed interactive Spotfire dashboards to predict LPFV dates and track KPIs (site activation, enrollment curves), integrating patient/site/study-level metrics for end-to-end trial monitoring using Bayesian model
- Automated 100% of manual tracking, accelerating reporting cycles by 40% and improving LPFV prediction accuracy by 90%

Clinical Data Quality & Visibility Suite

- Developed end-to-end analytics and reporting solutions to drive evidence generation and trial oversight
- Automated and centralized clinical reporting using Python-pptx, hosted on Domino to consolidate trial metrics, close evidence gaps, and track study endpoints—enhancing visibility across clinical and medical teams
- Delivered a user-friendly Tableau dashboard empowering MSLS to monitor the metrics during field engagements
- Created targeted, actionable insight-driven newsletters with Python-pptx to drive data quality improvements and accountability

Cross Product Analysis for a Fortune 100 Retail Company

- Built Tableau dashboard for the product experience team to understand user product experience journey from one platform to another, and to aid in the conversion/retention of existing users to customers
- Implemented a pipeline in Databricks using SQL by performing data transformation, and logic formation to consolidate the required data from multiple sources for KPIs and visualizations
- Analyzed cross-platform onboarding and engagement trends, uncovering user behavior patterns to drive adoption and retention

Education

Bachelor of Technology in Computer Science Engineering

2017 - 2021

SRM Institute of Science & Technology, Chennai

Organization Contribution and Achievements

- **Mentoring/Training:** Fostered a high-performance culture through mentorship, resulting in improved team productivity and implementing targeted training that significantly reduced operational errors and project delays
- **Awards/Recognitions:** Received multiple SPOT Awards for excellence in automation, delivery, and quality. Recognized by clients for impactful outcomes and strong stakeholder management.
