Summary

Business Analytics graduate with hands-on experience in exploratory data analysis, statistical reporting, and business insight generation across operational and customer datasets. Skilled in translating data into actionable insights supporting decision-making, process improvement, and performance tracking in cross-functional environments.

Skills

Business & Data Analysis, Exploratory & Confirmatory Data Analysis, SQL, Python, Power BI, Excel, Data Visualization, Statistical Interpretation, Business Reporting, Stakeholder Communication, Process Analysis

Experience

Concentrix Daksh Services India Pvt Ltd

Jul 2025 – Sep 2025

Research Analyst Intern

- Conducted operational research and content workflow analysis to support efficiency and quality initiatives.
- Collaborated with cross-functional and international stakeholders to consolidate findings and prepare structured analytical summaries.
- Supported evaluation frameworks related to operational risk awareness and compliance-oriented processes.

Unified Mentor

Apr 2025 – May 2025

Data Analytics Intern

- Analyzed operational and consumer datasets to identify performance trends, inefficiencies, and decision-support insights.
- Conducted data cleaning, validation, and exploratory analysis; translated results into business-level interpretations for reporting.
- Supported predictive analysis workflows to improve understanding of healthcare-related risk indicators.

Shell-Edunet Skills4Future (AICTE)

Jan 2025 – Mar 2025

AI & Data Analytics Intern

- Performed exploratory and confirmatory analysis on environmental datasets to assess air quality drivers and seasonal patterns.
- Compared regression-based approaches using statistical metrics; communicated findings through visual and written reports.
- Built structured analytical pipelines emphasizing data quality, interpretability, and validation.

Projects

Vendor Performance and Inventory Analytics (*Python, Pandas, Statistical Analysis, Data Visualization*)

- Analyzed multi-table vendor datasets to assess profitability, cost behavior, and operational efficiency.
- Evaluated margin trends, inventory turnover, and pricing correlations to identify improvement opportunities.
- Delivered data-backed insights supporting vendor strategy and operational decision-making.

Hospitality Booking Performance Analytics (*Power BI, DAX, Data Modeling*)

- Designed end-to-end BI reporting solution covering revenue, occupancy, and booking performance.
- Built star-schema data model, defined DAX-based KPIs, and developed interactive dashboards for management review.
- Enabled tracking of operational and strategic metrics to support planning decisions.

Customer Churn & Segmentation Analysis (*Python, Pandas, Power BI, DAX*)

- Conducted structured EDA to identify demographic and behavioral patterns across customer lifecycle stages.
- Performed segmentation and comparative analysis to support retention-focused decision strategies.
- Prepared clean, analysis-ready datasets for downstream business use.

Certifications

Data Science Course – Coursera

SQL Certification – HackerRank

Covered Python, data cleaning, basic ML, and visualization

Strengthened SQL querying fundamentals

Education

B.Tech, Computer Science and Engineering (AIML)

Graduated 2025 June

Joginapally B.R Engineering College
