Introduction

Data Analyst with 2 years of experience in healthcare technology, specializing in automating data workflows, building interactive dashboards, and delivering data-driven insights that improve client outcomes and product usability.

Education

Vellore Institute Of Technology

MCA - 8.57 CGPA

September 2022 - July 2024

Vellore, Tamil Nadu

Maharishi Dayanand Saraswati University

BCA - 81.6%

July 2019 – July 2022

Ajmer, Rajasthan

Central Academy

Senior Secondary (Commerce) - 92.8%

April 2018 – July 2019

Bhilwara, Rajasthan

Cambridge Court High School

Secondary Education - 8.4 CGPA

April 2016 – July 2017

Jaipur, Rajasthan

Experience

Visit Health

Data Analyst

June 2024 – Present

Gurgaon, Haryana

- Automated corporate utilization reporting using Python and SQL integrated with ERPNext, reducing manual reporting effort by 40% and ensuring 100% accuracy across 100K+ user records.
- Developed interactive dashboards in Tableau, Looker Studio, and QuickSight, visualizing engagement, utilization trends, and policy performance for 200+ corporate clients, improving decision-making speed by 30%.
- Optimized internal data workflows with automated ETL pipelines, enabling faster and more reliable delivery of large-scale datasets to stakeholders.
- Configured and managed app modules (corporate policies, wellness challenges, GMC portals) to ensure data consistency and alignment with client requirements, supporting seamless onboarding for 10K+ users.
- Partnered with cross-functional teams (sales, support, leadership, client-facing) to translate business requirements into scalable reporting solutions, enhancing data-driven decisions.
- Validated datasets and tested new app features with developers, identifying discrepancies and improving data integrity, resulting in a 25% reduction in post-release bug reports.

Visit Health

Data Analyst - Intern

September 2023 – May 2024

Noida, Uttar Pradesh

- Assisted in building SQL queries, Excel reports, and Looker Studio dashboards for corporate utilization tracking, handling datasets of 10K+ users.
- Gained end-to-end understanding of healthcare data workflows including GMC policies, corporate benefit structures, and app-driven user data collection.
- Performed data cleaning, quality checks, and ad-hoc analysis to support accurate reporting for corporate clients.
- Gained hands-on experience with app configurations and internal automation pipelines, reducing manual workload and improving reporting efficiency.

Projects

Car Evaluation System | Python, Machine Learning (Random Forest, Decision Tree)

Team Project

- Designed and implemented ML models to predict car purchase suitability using key features (price, maintenance, safety).
- Contributed to feature engineering, data preprocessing, and model evaluation, achieving over 85% prediction accuracy.

Insurance Report Automation | Power BI, Microsoft Azure, SQL

Team Project

- Automated insurance data reporting by building an Azure-integrated Power BI dashboard for real-time visibility of plans, premiums, and claims.
- Reduced manual reporting time by 60% and enabled faster decision-making for stakeholders.

Cybercrime Trend Analysis (Pre/Post COVID-19) | Python, Pandas, Machine Learning

Team Project

- Analyzed 10K+ cybercrime records to identify shifts in crime categories before and after COVID-19.
- Applied clustering and visualization techniques to reveal significant changes in fraud and identity theft patterns.

Data Analytics Toolkit

Programming & Query Languages: Python — SQL — R — HTML/CSS

Data Visualization & BI Tools: Tableau — Looker Studio — AWS QuickSight — Power BI — Excel

Data Handling & Analysis: Data Cleaning — Data Transformation — ETL Pipelines — Automation Scripts

Platforms & Tools: GitHub — VS Code — ERPNext — AWS Services (S3, Lambda)

Certifications
