nupurmanglic@gmail.com
[linkedin/nupurmanglic](https://www.linkedin.com/in/nupurmanglic)

Data Engineer with ~4 years of experience in designing, maintaining, and optimizing **ETL pipelines** for large-scale data and real-time processing. Skilled in pipeline automation, debugging, and root cause analysis in **UTM** to ensure high data quality and reliability. Experienced in working with major telecom clients, including Safaricom, Vodafone Idea, Asiacell, T-Fiber, and the Indian Army UNMS, delivering scalable solutions that improve efficiency and data integrity.

SKILLS

- SQL
- Python
- ETL Workflow
- Linux
- Java Script
- UAT

TOOLS

- UTM
- UOC
- Pentaho Spoon
- MS Excel
- AWS - S3
- VS Code
- Power BI
- Github

SOFT SKILLS

- Story Telling
- Decision Making
- Communication Skills
- Problem Solving
- Critical Thinking
- Adaptable/Flexible

AWARDS

Received multiple recognition star points for good work.

EDUCATION

Bachelors in Technology
2017-2021
Mody University of Science and Technology, Rajasthan India
Computer Science - 90%

INTERESTS

- Travelling
- Playing Badminton
- Strength Training

WORK EXPERIENCE - HEWLETT PACKARD

Service Information Developer - Delivery JAN 2024 - SEP 2025

- **Designed, developed, and deployed** ETL pipelines and workflows for **large-scale telecommunication** data systems into **UTM**.
- **Collaborated** with global stakeholders to gather requirements, brainstorm potential risks, and **deliver robust solutions**.
- **Optimized** data workflows inn UTM to **reduce the runtime**, improve system performance, and **reduce manual interventions**.
- Conducted **on-site project visits** to provide customized solutions for telecom operators, ensuring business continuity.

Associate Developer – Support NOV 2021 - DEC 2023

- Handled **support operations** for telecom clients by **resolving customer tickets** and ensuring **smooth data integration in UTM**.
- **Performed** Root Cause Analysis (**RCA**) on data mismatches in UTM, improving **issue resolution time** and system reliability.
- **Loaded and validated** large-scale inventory data into databases, conducting **sanity checks** to ensure data accuracy.
- Provided **knowledge transfer (KT) sessions** to clients and team members on issue mitigation and process improvements.

PROJECTS UNDERTAKEN

Network Health Monitoring Dashboard – Safaricom

- **Designed & deployed** an interactive dashboard on **UOC** to monitor the health of multiple network element links in real time.
- Built **hierarchical network maps** by vendor and region with alerts for active issues.
- Implemented a **visual topology map** displaying interconnections between **towers, antennas, routers, and links**.
- Enabled **drill-down functionality** for detailed insights on each element, including location, warning type, and assigned engineer.

ETL Automation - Safaricom(Kenya, EMEA Region)

- **Maintained direct communication** with clients by providing real-time updates, resolving issues promptly, and ensuring customer satisfaction.
- **Designed and implemented reusable**, automated ETL transformations that reduced manual interventions and optimized daily data processing with faster execution times.
- Supported **critical production cutovers**, ensuring smooth transitions with minimal downtime.
- Conducted **User Acceptance Testing (UAT)** for robust workflows, improving solution stability and reliability.

Indian ARMY - UNMS [On-Site]

- Collaborated with LnT to **gather network device's specifications** and schema requirements, ensuring accurate data representation for the **Indian Army**.
- **Designed and automated a robust ETL pipeline** in UTM to automate data ingestion and transformation.
